For the Life of the Line
SecurAcath® provides improved catheter securement for the life of the line

- Prevents therapy interruption
- May improve vessel health and preservation
- Lowers total cost of patient care

SecurAcath is the only Subcutaneous Engineered Stabilization Device (ESD) that Meets the 2016 Infusion Therapy Standards of Practice*
  - The new Standards state:
    - Subcutaneous ESDs have been successful in stabilizing PICCs and CVADs
    - Patient outcomes and patient and inserter satisfaction have been favorable
    - The Standards also include a new caution to be aware of the risk of medical adhesive-related skin injury (MARSI) associated with the use of adhesive-based ESDs
    - SecurAcath eliminates MARSI complications of adhesive-based ESDs

Dramatically Reduced Catheter Dislodgement
  - SecurAcath clinical data publications show very low catheter dislodgement rates of 0–1.5%1,4
  - Adhesive securement devices have published dislodgement rates of 14–20%7,8
  - Many accidental dislodgements occur during dressing changes when catheter is not secured
  - Decreased catheter replacement costs
    - PICC replacement cost is approximately $500 at bedside, $1000 in IR, $1200 in pediatrics

Decreased Catheter Movement
  - Catheter movement at the insertion site can introduce bacteria beneath the skin9
  - Improved stability may promote healing at insertion site, which acts as a natural barrier to infection
  - May reduce phlebitis, thrombosis and infection

Improved Efficiency
  - One SecurAcath secures for the life of the line
  - Catheter remains secure during dressing changes
  - Saves time during routine dressing changes
    - Dressing change can be done 3–5 minutes faster
  - Allows easy catheter repositioning if catheter tip must be pulled back

360-Degree Site Cleaning While Secured
  - Excellent cleaning access around the entire insertion site
  - Catheter remains stable and secure during cleaning
  - Improved stability and cleaning may help reduce infections

No Needle Sticks
  - Eliminates costly suture needlestick risk
  - Average cost of needlestick injury is $82515,16
  - There are over 92,000 suture needlestick injuries to healthcare workers in the U.S. each year15
