

## **Clinical Training Specialist (Per Diem)**

### **Job Description:**

Clinical Training Specialist will provide training for a novel new device for securing PICC and central lines. The SecurAcath eliminates the need for adhesive devices or sutures and secures for the life of the line.

### **Responsibilities:**

- Provide training on the SecurAcath device to vascular access, floor and home healthcare nurses.
- Coordinate Vascular Access product evaluations within the territory to include: selecting the evaluation units, negotiating the quantity of product, length of the evaluation, training of hospital personnel and working with Interrad Medical resources on scheduling of sales and service support.
- Prepare thorough written reports for existing and prospective customers.
- Establish and maintain relationships with nurses, doctors, and other healthcare professionals in the healthcare community.
- Maintain open communication with the Director of Clinical Services and sales representatives.
- Communicate in a timely, consistent, and clear manner.
- Perform other related duties assigned.

### **Qualifications:**

- Candidates must be an RN with Bachelor-level degree.
- Previous experience providing per diem training on vascular access products is desired.
- Candidate should also be a team player who has a strong understanding of hospital structure and role of personnel.
- Extensive knowledge of IV products and services.
- Strong communication and organizational skills.
- This position is a part-time, as needed.
- Frequent travel (60-70%), and working off-hours and shifts can be expected.
